

The Baltimore–Washington Area's **LEEDing** Waste Removal Service

Diamond Waste can help you meet the stringent recycling requirements of LEED-certified green building projects.

Every day more and more jurisdictions are mandating green building requirements. Likewise, owners and construction companies are stepping up to this challenge.

Is your company ready for green building and projects seeking LEED certification?

The LEED (Leadership in Energy and Environmental Design) rating system is a voluntary set of building performance standards developed by the U.S. Green Building Council. Its goal is maximizing operational efficiency while minimizing environmental impact. LEED certification is available for all building types including new construction and major renovation.

LEED is a point based system. Projects earn LEED points for satisfying specific green building criteria. The number of points the project earns determines the level of LEED certification the project receives.

Waste removal and recycling are an important part of this system.

Implementing an appropriate waste removal and recycling program and documenting your results are required to achieve LEED points toward the LEED certification process.

Diamond Waste is proud to have helped builders of the BAC/IMI National Training Center in Bowie, Maryland to achieve LEED Green Building certification for the facility (as seen in Engineering News Record, October 3, 2007).

Diamond Waste Services, Inc. can help you establish a suitable policy, implement a specific program on your job site and document the results as part of the LEED certification process for your project.

Yes, we'll take care of the waste removal, recycling and the paperwork too.

We can help with LEED compliant waste and recycling removal.

Don't wait another minute to get a LEED on your competition!

Call Diamond Waste Services today and schedule a free LEED consultation.

Our Service Shines!

The 25-acre campus includes a 60,500 sq. ft. training center, with offices, classrooms and design studios; and a 45,500-square-foot conference center with offices, recreation facilities, and rooms for 108 students.

Project: Johns Hopkins National Institute of Health, Bayview Campus; Location: Baltimore, MD; Contractor: Skanska USA; Completed: 2008.

- ◆ **Scheduled service 24 hours per day, 7 days per week and our dispatch is always available to answer your call.**
- ◆ **Experience at obtaining security clearances to access and provide services to secure installations such as airports, military bases and government facilities.**
- ◆ **Veteran owned and operated.**

YOU CAN RELY ON DIAMOND WASTE TO BE THERE—CALL US TODAY!

When the job schedule is critical and you need on-time, no-nonsense waste removal—call Diamond Waste! We'll get the job done. Reliably. After all, "Our Service Shines!"

LETTER FROM THE PRESIDENT

As president of Diamond Waste Services, Inc., my personal mission is this—to simplify the waste and recycling removal process for our customers. To do this I ensure our service team practices disciplined vigilance everyday and leaves nothing to chance when it comes to providing our customers with the very best service.

No matter how challenging the construction or demolition project may be, we have always met the highest standards for quality service at a competitive cost. These two issues are fundamental to getting the job done right the first time and this is our top priority each and every day.

Our punctuality can make your day easier. The added value we bring to your project is prompt, on-time waste removal and recycling service with accurate documentation. In today's construction environment your job is already fast paced enough without adding complications resulting from slow waste pick-ups and poor LEED documentation.

Our commitment is to make the waste and recycling removal process simple and easy, freeing you to concentrate on the multitude of other tasks you face.

Communication and understanding are of critical importance to success. We work hard to develop team relationships between our management and service personnel and the construction and demolition project executives, managers and superintendents who are our customers. This allows us to be knowledgeable of your priorities and how we can best help to achieve them.

We make commitments and we keep them!

*Sincerely,
Wallace Putkowski,
President*
